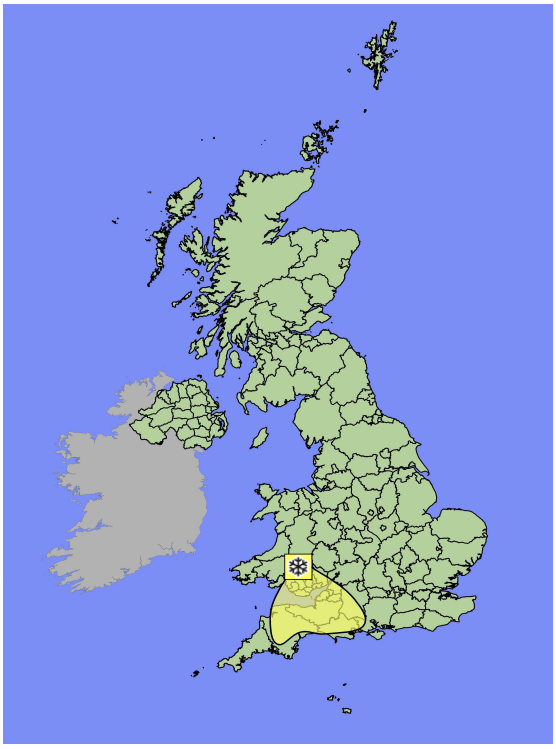
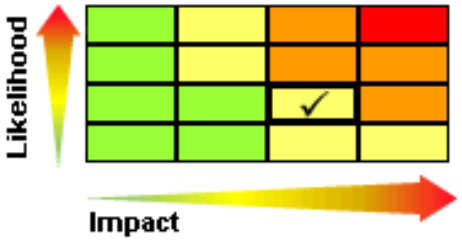
National Severe Weather Warning Service





Chief Forecasters Assessment
Complex frontal features are expected to move into southwestern areas of Britain on Monday night and to continue to affect parts of the south through Tuesday. The details remain very uncertain at present. With somewhat less cold air tying to push northeastwards into the area, there will be a fine balance between rain and snow with rain more likely on English Channel coasts.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **03:00 on Tue, 22nd Jan 2013** until **23:59 on Tue, 22nd Jan 2013**

Outbreaks of sleet or snow may affect parts of southwest England and south Wales during Tuesday. The main risk appears to be in the western portion of the warning area but snow may extend east as far as Wiltshire and Hampshire late on Tuesday. Some 2-5 cm of snow is likely in places with a risk of as much as 5-10 cm, more particularly high ground.
The public should be aware of possible disruption to transport.

As this is very likely to be updated please monitor the website for possible updates.
